1 Bidding platform for freelancers

1.1 Context

A lot of people have tasks that they would like to perform but either they are too busy or too lazy to do them. The goal of this project is to creative a platform where people can submits tasks or project they want and how much are they willing to pay for it.

Other people can bid on how much they are willing to be paid to perfom that task, then the person who post the task is going to choose a person from the people who bit and that person is going to do the task.

1.2 Purpose

Enable people to outsource their tasks, chores or projects.

1.3 Business value

People who post the project could get a more cheap option since there is competition, and people who have the time and skills are able to make some money, and as a hosting platform we charge a fee for posting the job and a service fee for every transaction.

2 Marketplace for used books

2.1 Context

You are in College, you finish your courses, you get your A's, now what do you do with your text books? You keep some, but there are one that you bought and you know you are never going to use them again, why not sell them?

2.2 Purpose

If you are in a University you course material do not change frequently so the next generation of students probably are going to use exactly the same book, instead of making the publishing companies richer why don't you help save the enviroment by donating or selling you used books.

2.3 Business value

Students who sell them get some money back, students who buy them get a book for a cheap price, the enviroment also benefits, and for the platform? 1 dolar per post, just to keep lights on.

3 Courier Service App

3.1 Context

You got sometime that you need to send urgently, is not a big package, is the size of the envelope, you can request a courier service to send a package in a specific radius for a specific price.

3.2 Purpose

Enable people to send packages without the need to fill out a form, wait in line or go to a specific place to send a package nearby.

3.3 Business value

We enable people to make money on the side and the platform collect a fee on each transaction.
